Economics 4990-4991: Honors Program in Economics
Gregory Besharov

The Undergraduate Honors Program in Economics is an opportunity for students who have demonstrated academic excellence in the major to pursue an independent research project. The program runs for the entire senior year, and the research is conducted under the close supervision of a faculty advisor. For admission to the second semester of the program (4991), students must successfully complete a thesis proposal and participate fully in the first semester (4990). Students who successfully complete the program graduate with honors. Higher levels of honors are awarded for superior performance on the thesis and in the program as a whole.
